

## What to Know About Vaccines

It seems each day, we awake to learn something more about the COVID-19 vaccines. It is critical that each individual have access to all the information in order to make an informed decision. The Charlotte Lozier Institute (CLI), the research and education arm of the Susan B. Anthony List, has published a detailed study on the leading vaccines in Operation Warp Speed. Several of these vaccines have already been approved by the FDA and are being distributed throughout the country. Many pro-lifers rightly have grave concerns about the ethical sources and testing procedures of these vaccines. The CLI research shows that some vaccine candidates did not use abortion-derived cell lines in their production. However, some used the abortion tainted cell line during the

testing phases and/or production. We have shared their chart below, last updated on January 5th. Furthermore, Life Site News is hosting a conference on February 19th called *Unmasking COVID-19: Vaccines, Mandates, and Global Health*. They will have many experts discussing the vaccine and other issues. Visit [lifesitenews.com/unmasking-vaccines](https://lifesitenews.com/unmasking-vaccines) for more information and to sign up. Individuals should look to religious leaders for moral guidance on taking the vaccine. Regardless, any vaccine that is tainted with an abortion-derived cell line is unethical and should be opposed. It is critical that, as pro-lifers, we advocate for fully ethical vaccines that end the trafficking and commoditization of aborted babies.

### Analysis of Covid-19 Vaccine Candidates

Includes vaccine candidates that received "Operation Warp Speed" funding or have been submitted to the FDA for emergency use approval. (This chart is reproduced from information obtained from the Charlotte Lozier Institute)

Sponsor(s)	Status	Development/ Production of Vaccine	Lab Testing
Pfizer/Biontech	Emergency Use FDA Application Approved	●	❖
Moderna	Emergency Use FDA Application Approved	●	❖
AstraZeneca	Phase 3 Trials	◆	◆
Johnson & Johnson/ Janssen	Phase 3 Trials	◆	◆
Novavax	Phase 3 Trials	●	❖
Sanofi/gsk	Phase 1/2 Trials	●	?
Inovio	Phase 1/2 Trials	●	❖
Merck	Phase 1 Trials	●	?

#### KEY

- Does not use abortion-derived cell line
- ◆ DOES USE abortion-derived cell line
- ❖ SOME tests **DO NOT** use abortion-derived cells, **SOME DO**
- ? Currently undetermined
