

THE OHIO HOUSE OF REPRESENTATIVES

134TH GENERAL ASSEMBLY

Gross Introduces Vaccine Protection Bill

Representative Jennifer Gross has introduced HR 248, the Vaccine Choice and Anti-Discrimination Act. It has been assigned to the House Health Committee.

Please reach out to the Health Committee members and explain to them why blanket coverage for vaccine exemption rights across the state, from both public and private entities, is vital to you and your family. Ask them respectfully to protect your right to make medical decisions for yourself without threat to your livelihood, or access to goods and services, **by voting YES on HB 248!**

FREE SPEECH IS UNDER ATTACK!

NATIONAL HEALTH FREEDOM ACTION

Urge Your Legislators to Ban Vaccine Passports in Your State!

States are going forward to prohibit vaccine and immunity passports.

Take Action to support legislation that protects the fundamental right of privacy and prohibits government and businesses from issuing or using vaccine passports.

The idea of vaccine or immunity passport has hit a deep nerve among Americans.

The concept of such a passport solicits massive push back because of its opportunistic infringement on fundamental rights of privacy and the right of all people to make their own health and medical decisions, including the right to accept or decline a vaccine. **The concept of vaccine passports endorses outright coercion.** It blatantly promotes discrimination and segregation. It encourages businesses and individuals to become arms of the police power of the government to force compliance of government policies.

People are rightfully asking: "Can they really do that?" "Isn't there a law prohibiting the government or businesses from requesting my personal medical information before I am allowed to have access to public life or transact business?" "Can a business really block me from entering a bus or a train, a store, a theater, or a restaurant, if I don't prove with proper data that I have obtained a government recommended vaccine?"

What would a vaccine passport do? Businesses would exclude individuals who have declined a vaccine or other medical treatment from receiving services even if the government does not require the vaccine or treatment.

Americans coercing each other into injecting something into their bodies that they do not wish, goes against everything it means to be an American.

It must give Americans pause. It doesn't matter whether the impetus for coercion is coming from government or businesses or both, it needs to stop. We can learn from the past and the destructive ways that coercion and discrimination have been used to control people. It is a grave mistake and time to stand for Health Freedom.

Urge Your Legislators to Support Bills Banning Vaccine Passports Now!
